

AMENDMENTS TO CLAIMS:

Agent for Applicant respectfully requests the following amendments to the claims without adding any new subject matter. Additions are shown in underlining, while deletions are shown in strikethrough or double square brackets. The Listing of claims will replace all prior version, and listings, of claims in the application:

Listing of Claims:

Claims 1-29 [Cancelled]

30. [New] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member having moving parts and a controller for said moving parts including information output circuitry which outputs information from said member concerning directions for the operation of said controller for the moving parts and an energy converter which converts energy to which the member is exposed to electrical energy for powering said information output circuitry wherein said information output circuitry outputs information regarding the directions for the operation of the controller for the moving parts.

31. [New] A member as claimed in Claim 30 wherein said energy converter comprises a solar panel provided on an exposed surface of said member.

32. [New] A member as claimed in Claim 31 wherein said information output circuitry is further linked to a biorhythm sensor.

33. [New] A member as claimed in Claim 32 including a digital display also powered by said energy converter and displaying information from said biorhythm sensor.

34. [New] A member as claimed in Claim 30 wherein said member comprises a chair and said energy converter converts motion of a moveable portion of the chair to electrical energy.

35. [New] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including an information output device which outputs information from said member, an energy converter which converts energy to which the

member is exposed to electrical energy for powering said information output device, wherein said information output device comprises a control for a moveable part of said chair, said control outputting information regarding directions of use of said control without producing the movements of the chair.

36. [New] A member as claimed in Claim 35 wherein said control provides audio feedback providing the directions for use of said control.

37. [New] A member as claimed in Claim 36 including a visual display also powered by said energy converter, said visual display visually displaying the directions for use of the controls.

38. [New] A member as claimed in Claim 30 including an electrical rechargeable power pack which is charged by said energy converter, said power pack storing the electrical energy and dispersing the electrical energy as required.

39. [New] A member as claimed in Claim 30 wherein said member comprises a chair having rolling casters for generating said electrical energy.

40. [New] A member as claimed in Claim 30 wherein said member comprises a chair and said chair has a back and seat and a moveable hinge between said back and seat for generating said electrical energy.

41. [New] A member as claimed in Claim 30 further having electrically operated body repositioning means powered by said energy converter, or rechargeable power pack.

42. [New] A member as claimed in Claim 41 wherein said member comprises a chair and said body repositioning means comprises a lumbar adjustment member, and said chair further includes an electrically generated timer which provides timed interval repositioning of said lumbar adjustment members.

43. [New] A chair having electrical power requirements, and a generator carried by said chair for converting energy to which the chair is exposed to electrical energy for powering said electrical power requirements.

44. [New] A chair as claimed in Claim 43 further including a rechargeable battery carried by said chair, wherein said generator recharges said battery, said battery powering said electrical power requirements of said chair.

45. [New] A chair having electrical power requirements for displaying information for the operation of controls to move parts of the chair comprising:

- (a) energy converter means carried by said chair for:
 - (i) providing power to said controls to move the parts of the chair and to display said information regarding directions for the operation of the controls to move such parts of the chair; and
 - (ii) providing power to said display regarding the directions for operation of said controls.

46. [New] A member as claimed in claim 30 wherein said information output circuitry outputs information regarding the directions for the operation of the controls for the moving parts without producing movement of the parts.

47. [New] A member selected from the group of members consisting of a chair member, a bed member, and a lounge member, said member including an information output device which outputs information from said member, an energy converter which converts energy to which the member is exposed to electrical energy for powering said output device, wherein said information output device comprises a control for a moveable part of said member, said control output device outputting information regarding directions of use of said control without producing the movement of the moveable part.
